Summary

Frontend Developer with professional experience in React.js, JavaScript, TypeScript, HTML5, CSS3, and REST API integration. Experienced in creating responsive, user-friendly interfaces, developing reusable components, and improving application performance. Strong understanding of Git, Agile methodologies, and modern web development practices. Seeking opportunities to contribute to innovative software development projects.

Skills

Languages: Java, JavaScript, TypeScript, Python, HTML5, CSS3

Frontend: React.js, Redux, Context API, Responsive Web Design

Backend & APIs: RESTful APIs, Postman

Databases: MongoDB, SQL

Tools: Git, GitHub, Visual Studio Code, Tableau, Power BI

Concepts: Data Structures & Algorithms, Object-Oriented Programming, Agile Development, Version Control, Performance Optimization

Experience

Software Developer

Dec 2024 – May 2026

Jayeesh Software Pvt. Ltd. (DoSystems), Hyderabad

React.js, JavaScript, TypeScript, REST APIs

- Developed and maintained responsive web applications using React.js, JavaScript, TypeScript, HTML, and CSS.
- Built reusable UI components using React Hooks, Context API, and Redux to improve maintainability and application performance.
- Integrated RESTful APIs to enable seamless communication between frontend and backend systems.
- Collaborated with cross-functional Agile teams to design, develop, test, and deploy new features within project timelines.
- Optimized application performance through debugging, code reviews, and implementing clean coding practices.
- Used Git for version control and collaborated with team members using pull requests and code reviews.

Projects

Practice Management (Hospital Management System) | React.js, JavaScript, REST APIs

2025

- Designed and developed a responsive hospital management web application using React.js with a reusable component-based architecture.
- Built reusable UI components using React Hooks and Context API to improve maintainability and scalability.
- Integrated RESTful APIs for patient records, appointment scheduling, and medical data management.
- Enhanced application performance and user experience by implementing responsive layouts and frontend optimization techniques.

Employee Management System (TRACK Portal) | React.js, TypeScript, REST APIs

2025

- Designed and developed a web-based employee management system for timesheet tracking, leave management, task monitoring, and project management.
- Developed responsive dashboards for employees and managers using React.js and reusable UI components.
- Integrated secure REST APIs and implemented role-based access control for efficient data management.
- Improved frontend performance and application maintainability by following modern React development best practices.

AI-Powered RAG Chatbot | Python, LangChain, FAISS, Ollama, Llama 3

2026

- Developed a Retrieval-Augmented Generation (RAG) chatbot for intelligent document question answering using Large Language Models.
- Implemented document ingestion, text chunking, embedding generation, and semantic search using LangChain and FAISS.
- Integrated Ollama with Llama 3 to generate accurate, context-aware responses from uploaded documents.
- Built an interactive interface for document upload, knowledge retrieval, and conversational question answering.

Certifications

- JavaScript Fundamentals to Advanced: Full Stack Development
- AI Agents Fundamentals
- Prompt Engineering
- AWS Academy Graduate
- Data Visualization with Power BI
- Database and SQL
- Programming in Java – NPTEL

Education

M.Tech in Computer Science and Engineering

2024 – 2026

Aditya Institute of Technology and Management CGPA: 8.4

B.Tech in Computer Science and Engineering

2020 – 2024

Aditya Institute of Technology and Management CGPA: 8.9
